your SoftPOS  
business

Extended features

# tap-POS

tap-POS is a cutting-edge solution tailored for SoftPOS merchants, revolutionizing the way businesses handle transactions. Our innovative tap-on-screen technology with portable point-of-sale devices, offering a secure and efficient payment experience. With tap-POS, merchants can accept contactless and QR payments swiftly, eliminating the need for traditional card readers or bulky equipment. Its user-friendly interface simplifies the checkout process, enhancing customer satisfaction and streamlining operations for businesses of all sizes.

Designed with convenience and flexibility in mind, tap-POS offers a flexible and cost-effective alternative. tap-POS provides a variety of plug-in accessories to cater to diverse payment environments. No matter if you operate in a portable, self-service, or customer-facing environment, tap-POS is the ideal solution for your business.
