More than just a
POS

tap-POS

Extended features

Android-based device accepts all EMV-based contactless cards & digital wallets flexibility

tap-POS enables your SoftPOS business to provide a more flexible and lower cost solution to merchants and is easier for customers. It is an ideal and lower cost option to accept contactless or QR codes payments instead of using cash registers or POS terminals.

The tap-POS Pago Pad design allows plug in variety of tap-POS accessories to fit different business environments.
