SoéPay SoftPOS

It is the most advanced SoftPOS white label solution in the market. SoftPOS is a brand new software-based payment solution that is suitable for various SME businesses. It turns Android smartphones into payment devices with contactless card acceptance and provides an innovative, leading edge SoftPOS White Label Solution with a low-cost standard package available. Its ready to use, fast to board software-based PIN entry function and quick time to market capabilities makes it your best white label solution. Core features include:

- PCI-DSS CPoC Certified, end-to-end PCI and card-scheme-certified total solution
- Full support of Level 3 application development and host integration
- Support software-based PIN entry function
- Streamlined, app-to-app integration
- Tap to phone partnerships with Visa and Mastercard
- Solid experience in traditional ISO8583 card-present host message connectivity
- Accepts all contactless payment devices such as cards, smartphones, wearables with NFC

tap-POS

This flexible and low-cost Android-11-based device accepts all EMV-based contactless card, digital wallet and QR code payment options. Together with its lightweight, portable design and printer kit available, it is an ideal option for various scenarios and can be a complement to any SoftPOS solution. Core features include:

- MediaTek MT6761 Quad-core A53@1.8GHz
- 5.45" FWVGA IPS capacitive multi-point touch
- 2MP FF rear camera with flashlight
- 300k pixels FF front camera
- 4G-LTE/3G/2G, WIFI/Bluetooth®
- Tap-on-Screen, Tilt-on-Screen
- 1GB RAM + 16GB Flash (optional: 2GB RAM + 16GB Flash)
- 2500mAh replaceable battery
- Optional 5000mAh with printer kit
